

APPENDIX E

Historic Wild Turkey Releases in California

A53 through A59

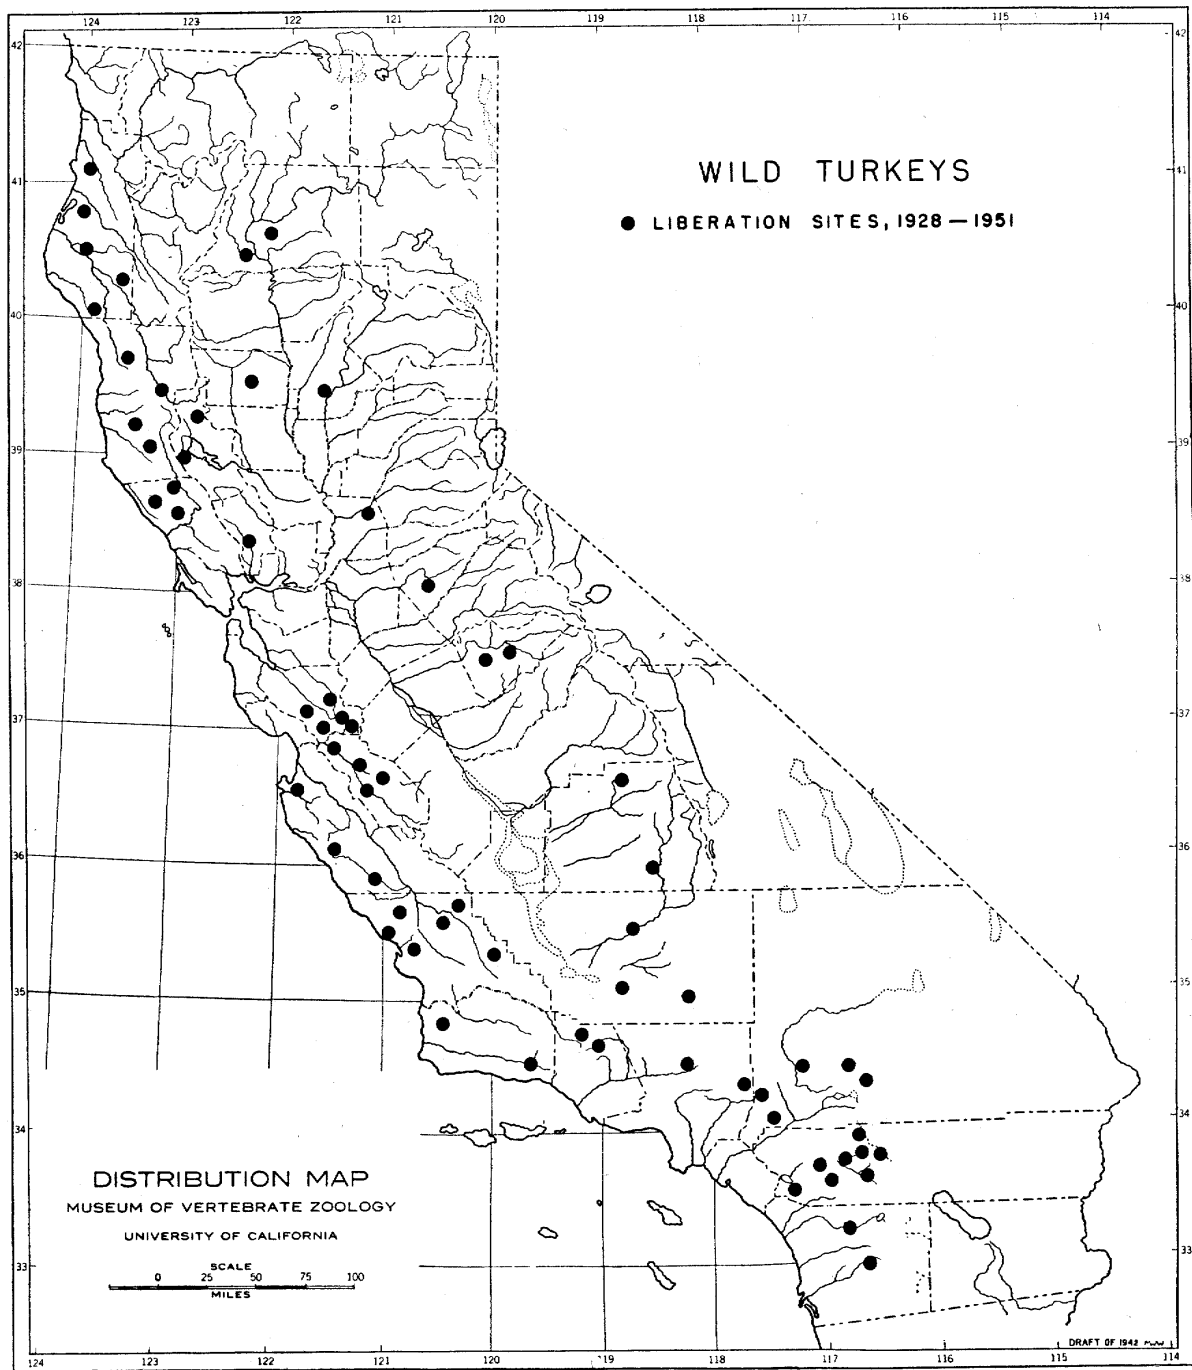

FIGURE 1. Distribution of the 71 sites where wild turkeys have been released in California since 1928.

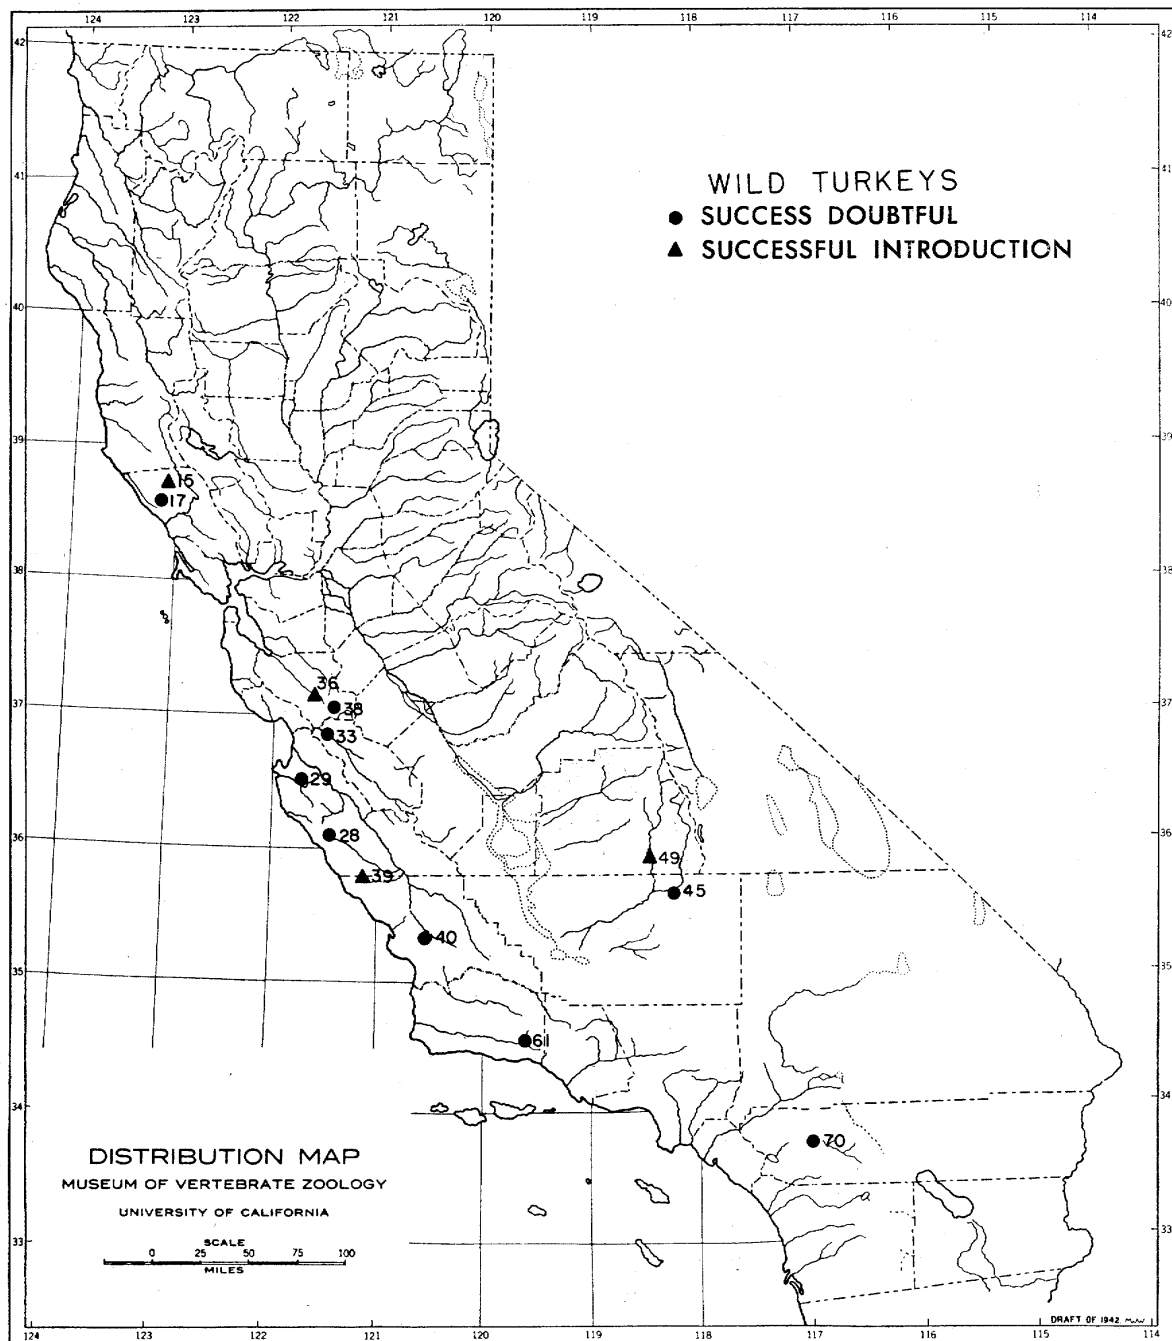

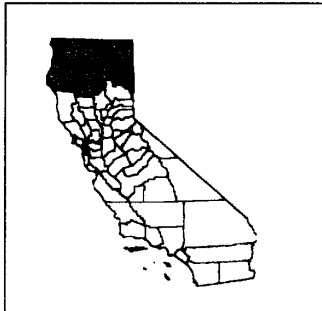

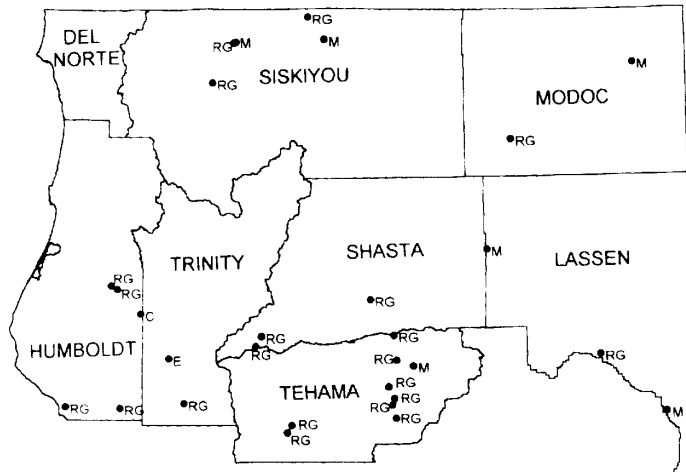

FIGURE 2. Locations of four wild turkey introductions judged "successful" in 1951, and nine introductions where turkeys still persist but where ultimate success is in doubt.

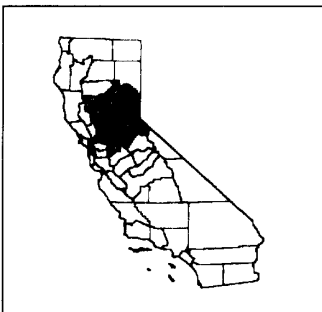

Wild Turkey Translocation Sites (Through 1988)* NORTHERN CALIFORNIA—NORTH COAST

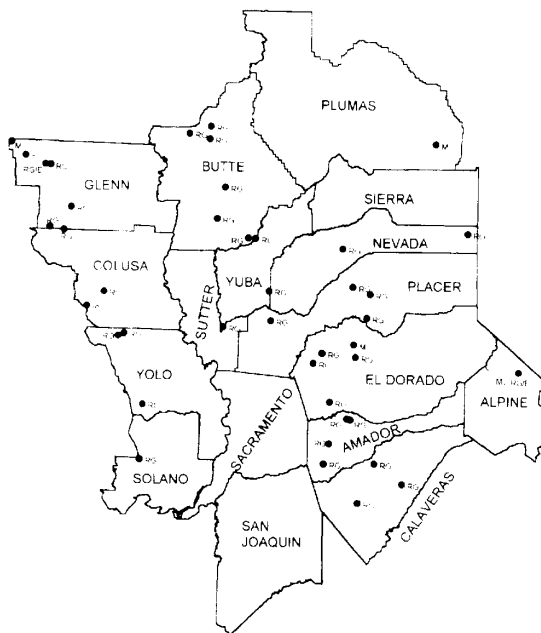

Subspecies	
RG	Rio Grande
M	Merriam's
E	Eastern
C	California

Wild Turkey Translocation Sites (Through 1988)* SACRAMENTO VALLEY—CENTRAL SIERRA NEVADA

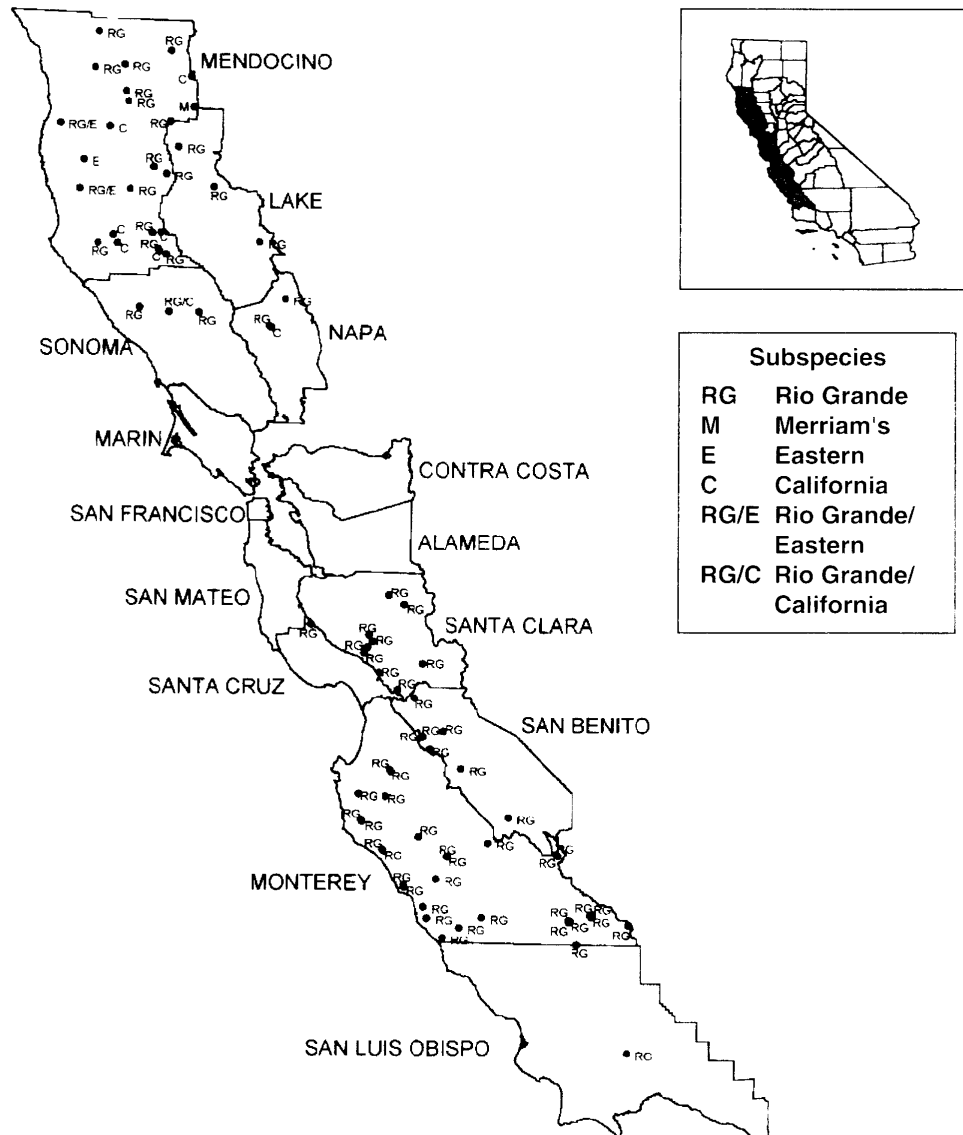

Subspecies	
RG	Rio Grande
M	Merriam's
C	California
RG/E	Rio Grande/ Eastern

*Not all translocations have resulted in established populations.

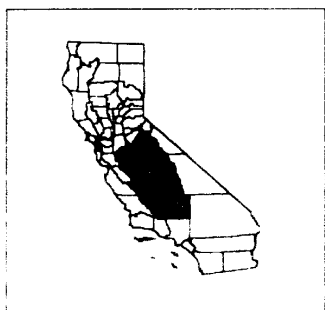

Wild Turkey Translocation Sites (Through 1988)* CENTRAL COAST

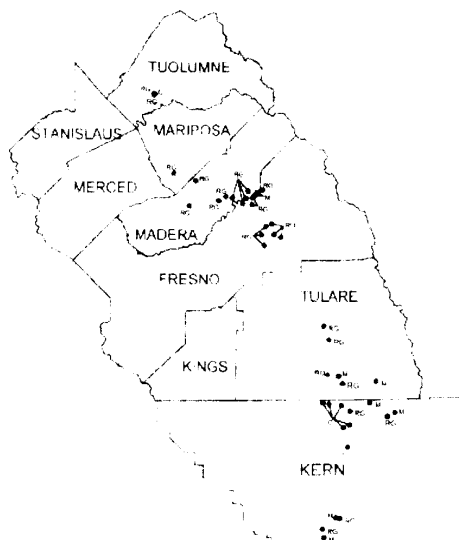

*Not all translocations have resulted in established populations

Wild Turkey Translocation Sites (Through 1988)*

SAN JOAQUIN VALLEY—SOUTHERN SIERRA NEVADA

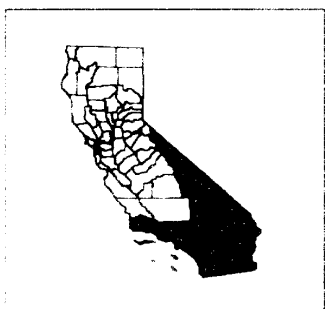

Subspecies	
RG	Rio Grande
M	Merriam's
C	California

Wild Turkey Translocation Sites (Through 1988)*

SOUTHERN CALIFORNIA—EASTERN SIERRA NEVADA

Subspecies	
RG	Rio Grande
M	Merriam's
C	California
RG/E	Rio Grande/ Eastern

*Not all translocations have resulted in established populations.
